Guiding Growth with Expertise and Empathy

Specialised Paediatric
Adolescent
Endocrinology Care

rela Hospital | rela women and children's HOSPITAL

PEDIATRIC ENDOCRINOLOGY IS A SUBSPECIALTY THAT DEALS WITH HORMONAL DISORDERS IN CHILDREN OCCURRING FROM BIRTH TO 18 YEARS OF AGE.

HORMONAL PROBLEMS IN CHILDREN CAN OCCUR WHEN ONE OR MORE OF THE FOLLOWING ORGANS ARE AFFECTED:

- Thyroid
- Pancreas
- Pituitary
- Adrenal
- Sex organs – testes in males, ovaries in females

4

OUR VISION AND MISSION

IN OUR DEPARTMENT WE TREAT THE FOLLOWING COMMONLY SEEN ENDOCRINE DISORDERS

CONGENITAL AND ACQUIRED HYPOTHYROIDISM

SHORT STATURE

OBESITY

PRECOCIOUS PUBERTY

TYPE 1 DIABETES MELLITUS

ADRENAL INSUFFICIENCY

DELAYED PUBERTY

ADOLESCENT PCOS

Together We Can **Make a Difference**

In the endocrine clinic, we spend time with the patient collecting information including detailed history from birth followed by examination of the child. Based on clinical, biochemical and radiological aspects a treatment plan is given.

As many of these conditions need close monitoring and lifelong care, at our centre we provide constant support including emergency services, in order to support the family as they raise their child.

Dynamic testing procedures for assessing specific hormones are also performed wherever indicated in our hospital. Under doctor's supervision, blood tests are conducted with close monitoring needed for diagnosing specific disorders

TYPE 1
DIABETES MELLITUS CLINIC:

Type 1 diabetes mellitus is the most common type of diabetes in children. It requires lifelong insulin therapy. Both parents and child need support for managing this difficult condition which is often a cause of mental distress for the family. Hence, here at Rela we offer comprehensive care for type 1 diabetes where the treatment is tailored for every child. The success of treatment is dependent on teamwork wherein the team consists of parents, pediatric endocrinologist, pediatric intensivist, nurses and dieticians. We aim to provide close care with regards to diet, insulin dosing and managing all other aspects of life while on insulin. Our aim is to ensure that every child with diabetes can achieve their potential and dreams while managing their condition optimally.
